MEDICAL PRODUCTS

Ready-Fit[™]

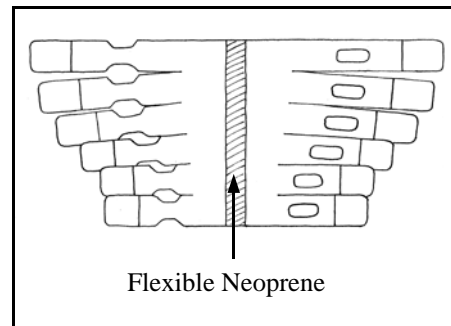

The Most Advanced, Comfortable,
Non-Elastic, Adjustable, CircAid[®] Legging

Our CircAid[®] Systems have become the definition of clinically proven, non-elastic, adjustable and thereby sustainable compression in the treatment of venous and lymphatic disease.

The Ready-Fit[™] features:

- ◆ A Smooth, Comfortable Fit
- ◆ Minimal Adjustments
- ◆ Neoprene Anchor for a Flexible, Firm Fit
- ◆ 5 Ready-to-Wear Sizes
- ◆ Little to No Slipping

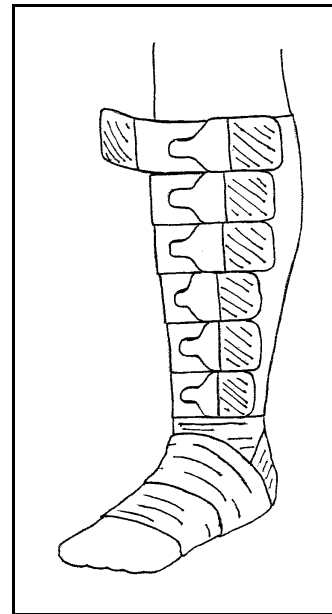

The design of the Ready-Fit makes it comfortable and easy to apply, with minimal to no adjustments required. The Neoprene anchor provides an incredible amount of flexibility to the non-elastic bands, thus insuring a perfect fit without buckling or slipping on the leg.

The Ready-Fit comes with an EZ[™] Ankle-Foot Wrap which covers the ankle and foot area completely. This augments the legging in reducing and containing edema.

The CircAid Ready-Fit is only available in standard sizes (small, medium, large, X-large, and XX-large) which require four measurements.

All CircAid Ready-Fit Lower Leg products are non-elastic and adjustable, are easy to apply and remove, come with a one-year guarantee, and can be worn 24 hours a day. They are also hypo-allergenic and can be hand-washed and air-dried.
